

ABHIJITH T M

FULL STACK DEVELOPER

+91 8891304194 abhijithtm861@gmail.com linkedin.com/in/abhijith-tm-34304a259 github.com/Abhijithgit104

Professional Summary

- BCA graduate with hands-on experience in React and Django
- Built full-stack applications using REST APIs and PostgreSQL
- Strong foundation in JavaScript and backend development
- Focused on building real-world projects and improving problem-solving skills

Technical Skills

Frontend: HTML, CSS, JavaScript, Typescript, React.js, Redux Js

Backend: Django, Flask (Basics), Node.js (Learning)

Database: PostgreSQL

CSS frameworks: Bootstrap, Material UI

Tools: Git, GitHub

Authentication: JWT

Deployment: Render, Vercel

Internship Experience

Uppcode Software Labs

June 2025 – February 2026

Full Stack Developer Intern

Calicut, Kerala

- Built responsive web applications using React.js, JavaScript, TypeScript, Bootstrap, and Material UI
- Developed reusable frontend components and integrated them with Django REST APIs for dynamic data handling
- Designed and developed backend APIs using Django and PostgreSQL for authentication and CRUD operations
- Implemented JWT-based authentication and secure user access across frontend and backend
- Worked on full-stack project deployment using Render and Vercel
- Collaborated using Git and GitHub following structured development workflows

Projects

Full-Stack E-commerce Application - React & Django

GitHub: [link]

Live Demo: [link]

- Built a full-stack e-commerce platform with authentication, product listing, cart, and order processing
- Developed REST APIs using Django REST Framework and integrated with React-Vite frontend
- Handled asynchronous API call and global states using Redux.js
- Implemented JWT authentication for secure user sessions
- Designed PostgreSQL database schema for users, products, and orders
- Handled dynamic UI updates and API integration for real-time cart functionality
- Deployed full-stack application using Render for backend hosting

Finance Dashboard Backend - Django REST API

GitHub: [link]

- Built a finance management backend using Django REST Framework
- Implemented role-based access control (Admin, Analyst, Viewer)
- Developed REST APIs for income and expense CRUD operations
- Created summary and analytics endpoints using Django ORM aggregation
- Integrated input validation, error handling, and proper HTTP responses

Portfolio - React JS Website

GitHub: [link]

Live Demo: [link]

- Developed a responsive personal portfolio website
- Implemented modern UI design and optimized performance

Next.js Ecommerce Store - Modern Web

GitHub: [link]

Live Demo: [link]

- Built a basic e-commerce UI using Next.js and TypeScript
- Focused on routing and component design

Flipkart Homepage Clone - UI Design

GitHub: [link]

Live Demo: [link]

- Created a responsive UI clone using HTML and CSS
- Focused on layout and responsiveness

Education

Ideal College For Advanced Studies

Bachelor of Computer Applications (BCA) | CGPA: 7.64/10

2022 – 2025

Kerala
